

Guitar Amp

designed/diagrammed by Alec Fehl 7/26/00

1] Crease.

2] More creases.

3] More creases.
Flip over.

4] More creases.

5] Crease. See next
step for landmark.

6] Note two creases
meet at point A.

7] Repeat step 5-6
on other 3 corners.

8a] Enlarge...

8b] Tiny valley crease.

9] Repeat on other
3 sides.

10] Collapse on existing creases.

11] Valley over while reverse folding top.

12] Repeat on other 3 ridges.

13] Similar to a petal fold. Fold flap in half while lifting top part.

14] Stand up. Model will not lay flat.

15] Spread ridge and flatten pyramid.

16] Flatten and close up top.

17] Repeat 3 more times.

18] Round off speaker with 8 mountain folds.

19] Looks like this. Flip over.

20] Crease raw edge to top of small inner square. Repeat on other 3 sides.

21] Fold raw edge to existing crease.
DO NOT repeat. Flip over.

22] Add valley bisectors.

23] Sink top corners. (More of
an inside reverse.) Flip over.

24] Reverse folds tiny corners.

25] Collapse to a box on existing creases. The lower corners are similar to a rabbit ear.

26] Fold up in half.

27] Fold over to lock bottom.

28] Like this. Flip over.

29] Rabbit ear on existing creases. This will straighten the side. Repeat on right.

30] Swivel on existing creases so ridge AB lies on crease BC. Repeat on right.

31] Like this. Tilt forward.
Note position of point Z.

32] Note point Z. Tilt forward again.

33] Fold flap in half.

34] Fold little flaps up to lock.
Tilt back up.

35] Valley down.

36] Tuck between layers to lock.
Tilt back up.
